

User stories for users

1. As a user, I want to create a profile with my name, phone number, and profile picture so that I can represent myself in a session.
2. As a user, I want to register for an account, so that I can access the application and use its features.
3. As a user, I want to be able to update my profile details after creation so that my information stays up to date.
4. As a user, I need the application to function reliably and without errors so that I can use it with issues.
5. As a user, I want to log in to my account, so that I can access and use the application.
6. As a user I want the app to be simple, visually appealing, and easy to navigate so that I can enjoy using it without getting frustrated.
7. As a user, I need the UI to be available in my preferred language to use the application effectively.
8. As a user, I want the application to support multiple languages, so I can interact with it in my preferred language without data corruption or formatting errors.
9. As a user, I want to be able to switch between multiple languages so I can use the application with my preferred languages.
10. As a user, I need the app to adhere to my culture so that I can use it intuitively.
11. As a user, I want to be confident that the app will not crash or lose my progress, even if I switch views or make unexpected inputs.
12. As a user, I want features to work consistently across the entire app, so I'm not confused by unexpected behavior in different views.
13. As a user, I expect the app to perform actions quickly and without lag, so that using it feels smooth and responsive.
14. As a user, I want my experience to stay smooth, even after internal improvements, so I don't have to relearn how to use the app.
15. As a user, I want the application to be validated by real people before release, so I can be confident that the features meet my needs and work correctly.
16. As a user, I want actions like navigating between views or matching to happen instantly, so I don't get interrupted or bored during use.
17. As a user, I want to see helpful error messages when something goes wrong, so I know how to fix the issue.
18. As a user, I want the app to be clearly documented, so I can find help and troubleshoot issues on my own.
19. As a user, I want a smooth installation process and clear usage instructions, so I can start using the app without help.

User stories for admin

1. As an admin, I want to view all registered users and matches, so that I can remove users or matches if necessary.
2. As an admin, I want to access past session data and match results so that I can review user engagement.

User stories for participants (guests and users)

1. As a participant, I want the app to be simple, visually appealing, and easy to navigate so that I have a great user experience.
2. As a participant, I want to have a help section with instructions on how to use the app so that I can easily understand how to use it.
3. As a participant, I want to have the option to join as a guest using only my phone number so that I can participate without a full profile.
4. As a participant, I want to have an easy way to update or adjust my interests during a session from my previously selected categories so that I can keep my list of interests up to date during a session.
5. As a participant, I need clear categories to choose my interests from so that I won't be overloaded with choices.
6. As a participant, I want to select from predefined categories so that I can quickly choose interesting options without sorting through ones that don't interest me.
7. As a participant, I want the app to show my match after the session with clear and simple visuals, so I can quickly understand the results.
8. As a participant, I want to start a session after setting up my profile so that I can be paired with a compatible match.
9. As a participant, I want the app to use other participants' interests to select the best match for me so that I am paired with someone who shares similar interests.

Features removed

1. **Sessions with codes:** Sessions are now automatically started by the user rather than joining an event.
2. **Session notifications:** No longer necessary as sessions are user-driven.
3. **Cancellation of sessions:** Not applicable in the new model.
4. **Manual matching and advanced session controls for organizers:** Matching is based on predefined dummy data.
5. **Chat and contact exchange:** No longer included.
6. **2-factor authentication:** No longer needed for simplified access.
7. **Customer support feature:** Removed as per the reduced scope.

Color explanations

-  = Most likely won't be implemented as per customer's wishes
-  = Still under debate
-  = Removed features
