

## User stories for users

1. As a user, I want to create a profile with my name, phone number, and profile picture so that I can represent myself in a session.
2. As a user, I need to be able to register to create a profile.
3. As a user, I want to be able to update my profile details after creation so that my information stays current.
4. As a user, I want to start a session after setting up my profile so that I can begin the matching process.
5. As a user, I need to be able to login to access my account.

## User stories for admin

1. As an admin, I want to have a view that displays the history of users and matches so that I can monitor application activity.
2. As an admin, I want to access past session data and match results so that I can review user engagement.

## User stories for participants (guests and users)

1. As a participant, I want the app to be simple, visually appealing, and easy to navigate so that I have a smooth user experience.
2. As a participant, I want to have a help section with instructions on how to use the app so that I can quickly resolve any confusion.
3. As a participant, I want to have a dark mode so that I can use the app in less well lit places as well.
4. As a participant, I want to have the option to join as a guest using only my phone number so that I can participate without a full profile.
5. As a participant, I need clear categories to choose interests from.
6. As a participant, I want to select different categories at the start of a session to not be overloaded with unwanted choices during a session.
7. As a participant, I want to choose items from my selected categories in subsequent steps so that my matches are based on more detailed preferences.
8. As a participant, I want the app to display a results screen after completing the selection process so that I can see my match.
9. As a participant, I want the app to use other participants' interests to select the best match for me.

## Features removed

1. **Sessions with codes:** Sessions are now automatically started by the user rather than joining an event.
2. **Session notifications:** No longer necessary as sessions are user-driven.
3. **Cancellation of sessions:** Not applicable in the new model.

4. **Manual matching and advanced session controls for organizers:** Matching is based on predefined dummy data.
5. **Chat and contact exchange:** No longer included.
6. **2-factor authentication:** No longer needed for simplified access.
7. **Customer support feature:** Removed as per the reduced scope.

### Color explanations

-  = Most likely won't be implemented as per customer's wishes
-  = Still under debate
-  = Removed features
