Sprint 7 Planning: Beta, Performance, and Reliability Testing

Sprint and Product Backlog Update (15.04.2025 to 16.04.2025)
- Review and update the product backlog to include User Acceptance Testing (UAT), bug fixing, beta testing, and performance evaluations.
- New user stories related to multilingual UI, session logic, and admin features.
- Backlog and sprint board updates in Trello.
- **Assigned to:** Mika

Acceptance Test Planning (17.04.2025 to 18.04.2025)
- Create an Acceptance Testing Plan based on project requirements and user stories (minimum of 10 test cases).
- The plan must include functional, usability, and performance test cases that cover all user interactions within the application.
- Criteria is based on Sprint goals and product backlog features.
- **Assigned to**: Jonne and Ade

Conduct Acceptance Testing (19.4.2025 to 25.4.2025)
- Document test results in an Excel sheet.
- All group members should take turns to act as customer representatives and conduct User Acceptance Testing (UAT) using the assigned test cases.
- **Assigned to**: Ade, Heta, Mika and Jonne

Documentation and Reporting (25.4.2025 to 28.4.2025)
- Write a report highlighting the conducted test cases.
- Include a result table and an evaluation of the severity and importance of any discovered errors or bugs.
- **Assigned to**: Ade, Heta, Mika and Jonne

Sprint Review and Retrospective (29.04.2025)
- Review UAT outcomes, test effectiveness, and resolved issues.
- Evaluate team performance and beta testing success.
- Document lessons learned for Sprint 8 and prepared final delivery goals.
- Prepare GitHub repository for submission.
- **Assigned to**: Ade, Heta, Mika and Jonne
